Event Title: NCC Flowline Strike	Media Interest: Low
Report Information	
<p>Overview: The morning of August 8th, 2023, the EPA Duty officer received a notification from the state that a flowline owned and operated by KP Kauffman was struck during the construction of a water conveyance ditch. Construction company, NCC, struck the line with an excavator releasing an estimated 635 gallons of crude oil into the water filled conveyance ditch. The spill site is in northern Fort Lupton near the NCC gravel pit and less than a mile from the South Platte River. Clean up and response actions are currently being taken by the responsible party.</p>	
<p>State, Local and other Federal Agency The Colorado Energy and Carbon Management Commission is on site providing oversight.</p> <p>Actions:</p>	
<p>EPA Actions: An EPA OSC was deployed the morning of 8/8/2023 to make a determination of impacts or threat of discharge to Waters of the U.S and to provide technical support for cleanup and response actions.</p> <p>Update: OSC Romero determined that the spill is contained and the current response actions taken by the responding parties is adequate. No further EPA action is required at this time.</p>
